347V FIXTURE

Canlet Lighting LLC is proud to announce the addition of the 347V fixtures to the non-metallic vapour-proof product line.

The 347V fixtures are available in the 18w, 26w, 32w, and 42w sizes. These fixtures utilize electronic ballast, which offers active thermal protection as well as advanced end lamp life protection.

With this introduction of the 347V fixtures, Canlet products can now be used in a wider range of commercial and industrial applications.

If you have any questions about the 347V fixtures, or any Canlet product, please call any one of our customer service assistants at 1-800-441-1771.
