

# PUK VE FIXTURES INSTALLATION INSTRUCTIONS

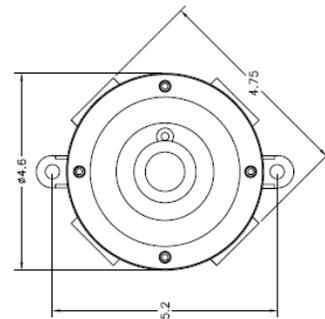

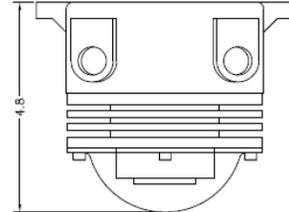

## INTRODUCTION

Canlet vaporproof lighting products are available as complete fixtures in wall, ceiling or pendant mount configurations. They are now available in LED. In order to ensure trouble free operation of the Canlet fixture, please ensure that the conduit has been securely tightened to 200 in lb. (22.6 Nm). Do not over tighten conduit as over tightening may cause enclosure to break. It is important that the correct wiring method be used to install the product in accordance with electrical code.

**Make sure to connect to the proper voltage, either 120 or 277v**

### A) Non-Metallic Wiring Methods

- Red wire = Line
- Blue wire = Neutral
